

- The estimates of scores are based on the performance of students who participated in a field study for these Reading Comprehension questions. Those students took the test on computer; you used a book. Although the two experiences are comparable, the differences make exact comparisons impossible.
- The students who participated in the field study were volunteers and may have differed in average ability from the actual TOEFL test-taking population.
- The conversion of scores from the field study in which these questions were administered to the current TOEFL iBT scale involved two scale conversions. Converting from one scale to another always involves some statistical error.

You should use your score estimate as a general guide only. Your actual score on TOEFL iBT may be higher or lower than your score on the practice version.
